

Learning about Coronavirus.

This story is about Coronavirus, which is a type of

pandemic.

A

pandemic

is

where

lots of people

in

a big

area

become

ill.

 The Coronavirus is spreading very fast and making

 lots of people all over the world feel worried or feel ill.

 Viruses are very small and adults have to use microscopes to

 see them. People can't see a virus if it is near them.

 This is OK.

 Lots of adults are very clever. They can't see Coronavirus but

 they still know what to do. By having healthy habits

 and working together, people can stop Coronavirus spreading.

 This helps to keep everyone healthy. This is OK.

So that they can stay healthy, everyone needs to
 wash their hands lots at the moment. Adults will help
 children to remember to wash their hands by asking or telling
 them. This is OK.

 Coronavirus
 
 has been
 
 travelling
 
 quickly
 
 around
 
 the world. If

 too many
 
 people
 
 are
 
 close
 together
 
 in
 
 the same
 
 place, it

 makes
 
 is
 easier
 
 for Coronavirus
 
 to
 spread.
 
 More
 
 people

 might
 
 get
 
 more
 
 ill
 
 quickly.
 
 Clubs,
 
 sports
 
 and
 
 sometimes

 schools
 
 might
 
 close
 
 because of Coronavirus.
 
 This
 
 is
 makes
 it

 spread
 
 more slowly.
 
 This
 
 is
 OK.

 Some people might have to change their holidays because of

 Coronavirus. People try to stay away from busy places where

 there are lots of people, to help everyone to stay safe.

 Some people might go on holiday on a different day

 to the day they had planned. This is OK.

 Adults are learning more about Coronavirus every day. Mums

 and Dads might read the newspaper, Internet or watch

 the TV to find out more information. Mums and Dads are

 also learning how to keep children safe. If I have

 questions, I can ask my Mum or Dad. This is OK.

 don't
 
 happen
 
 very
 
 often.
 
 They
 
 happen
 
 about
 

1
 
 once
 
 every
 25
 or
 30
 
 years.
 

 Pandemics
 might
 
 last
 a
 

 few
 
 weeks
 or
 
 months,
 but
 
 they
 always
 
 end.
 This
 is
 

 OK.

It
 
 I can
 
 keep safe
 by
 
 making
 
 sure
 
 I
 
 wash my hands
 
 often,
 

 by
 
 listening
 to
 
 adults
 and
 
 by
 
 telling
 someone
 if
 I
 

 feel
 
 poorly.
