

Thameside Primary School: Maths Calculation Guidelines

Approved by Governors: September 2022

Review date: September 2025

Aim:

To ensure consistency in approach with regards to the teaching and learning of each operation and to provide parents/carers with clarity as to how the National Curriculum is implemented at Thameside.

Rationale:

The key to successful implementation of school calculation guidelines is consistent use of representations (model and images that support conceptual understanding of the mathematics) and these guidelines promote key representations across the primary years. Mathematical understanding is developed through use of representations that are first of all concrete (e.g. Numicon, Dienes apparatus), and then pictorial (e.g. Array, place value counters) to then facilitate abstract working (e.g. Columnar addition, long multiplication). This document guides teachers through an appropriate progression of representations, and if at any point a pupil is struggling they should revert to familiar pictorial and/or concrete materials/representations as appropriate. Whilst a mathematically fluent child will be able to choose the most appropriate representation and procedure to carry out a calculation, whether written or mental, Thameside supports pupils with carefully selected representations that underpin calculation methods (as detailed in these guidelines), to ensure there is consistency across year groups.

Contents	
Progression framework	p.3
Calculation guidelines:	
• Addition	p.4
• Subtraction	p.6
• Multiplication	p.8
• Division	p.10

Appendix	
<p><i>At Thameside, we use the White Rose Math Hub resources as the spine when we plan our bespoke teaching for maths mastery lessons. Therefore, our Calculations Guidelines should be read in conjunction with their policies:</i></p>	
<p>Appendix A: Addition & Subtraction White Rose Hub Calculation Policy</p>	
<p>Appendix B: Multiplication & Division White Rose Hub Calculation Policy</p>	

Policy reviewed by:	Heather Maddock & Sophie Greenaway
Key Changes:	Reference made to detailed White Rose Hub calculation policies which have been included as appendices to support teaching for maths mastery.

Progression framework

	EIFS/Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Addition	<p>Combining two parts to make a whole: part whole model.</p> <p>Starting at the bigger number and counting on- using cubes.</p> <p>Regrouping to make 10 using ten frame.</p>	<p>Adding three single digits.</p> <p>Use of base 10 to combine two numbers.</p>	<p>Column method- regrouping.</p> <p>Using place value counters (up to 3 digits).</p>	<p>Column method- regrouping.</p> <p>(up to 4 digits)</p>	<p>Column method- regrouping.</p> <p>Use of place value counters for adding decimals.</p>	<p>Column method- regrouping.</p> <p>Abstract methods.</p> <p>Place value counters to be used for adding decimal numbers.</p>
Subtraction	<p>Taking away ones</p> <p>Counting back</p> <p>Find the difference</p> <p>Part whole model</p> <p>Make 10 using the ten frame</p>	<p>Counting back</p> <p>Find the difference</p> <p>Part whole model</p> <p>Make 10</p> <p>Use of base 10</p>	<p>Column method with regrouping.</p> <p>(up to 3 digits using place value counters)</p>	<p>Column method with regrouping.</p> <p>(up to 4 digits)</p>	<p>Column method with regrouping.</p> <p>Abstract for whole numbers.</p> <p>Start with place value counters for decimals- with the same amount of decimal places.</p>	<p>Column method with regrouping.</p> <p>Abstract methods.</p> <p>Place value counters for decimals- with different amounts of decimal places.</p>

Multiplication	<p>Recognising and making equal groups.</p> <p>Doubling</p> <p>Counting in multiples Use cubes, Numicon and other objects in the classroom</p>	<p>Arrays- showing commutative multiplication</p>	<p>Arrays</p> <p>$2d \times 1d$ using base 10</p>	<p>Column multiplication- introduced with place value counters.</p> <p>(2 and 3 digit multiplied by 1 digit)</p>	<p>Column multiplication</p> <p>Abstract only but might need a repeat of year 4 first (up to 4 digit numbers multiplied by 1 or 2 digits)</p>	<p>Column multiplication</p> <p>Abstract methods (multi-digit up to 4 digits by a 2 digit number)</p>
Division	<p>Sharing objects into groups</p> <p>Division as grouping e.g. I have 12 sweets and put them in groups of 3, how many groups?</p> <p>Use cubes and draw round 3 cubes at a time.</p>	<p>Division as grouping</p> <p>Division within arrays- linking to multiplication</p> <p>Repeated subtraction</p>	<p>Division with a remainder- using lollipop sticks, times tables facts and repeated subtraction.</p> <p>$2d$ divided by $1d$ using base 10 or place value counters</p>	<p>Division with a remainder</p> <p>Short division (up to 3 digits by 1 digit- concrete and pictorial)</p>	<p>Short division</p> <p>(up to 4 digits by a 1 digit number including remainders)</p>	<p>Short division</p> <p>Long division with place value counters (up to 4 digits by a 2 digit number)</p> <p>Children should exchange into the tenths and hundredths column too</p>

Calculation guidelines

Calculation policy: Addition

Key language: sum, total, parts and wholes, plus, add, altogether, more, 'is equal to' 'is the same as'.

Concrete	Pictorial	Abstract
<p>Combining two parts to make a whole (use other resources too e.g. eggs, shells, teddy bears, cars).</p> 	<p>Children to represent the cubes using dots or crosses. They could put each part on a part whole model too.</p> 	<p>$4 + 3 = 7$ Four is a part, 3 is a part and the whole is seven.</p> 
<p>Counting on using number lines using cubes or Numicon.</p>  	<p>A bar model which encourages the children to count on, rather than count all.</p> 	<p>The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2? $4 + 2$</p> 
<p>Regrouping to make 10; using ten frames and counters/cubes or using Numicon. $6 + 5$</p> 	<p>Children to draw the ten frame and counters/cubes.</p> 	<p>Children to develop an understanding of equality e.g.</p> <p>$6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$</p>
<p>TO + O using base 10. Continue to develop understanding of partitioning and place value. $41 + 8$</p> 	<p>Children to represent the base 10 e.g. lines for tens and dot/crosses for ones.</p> 	<p>$41 + 8$</p> <p>$1 + 8 = 9$ $40 + 9 = 49$</p> 
<p>TO + TO using base 10. Continue to develop understanding of partitioning and place value. $36 + 25$</p> 	<p>Children to represent the base 10 in a place value chart.</p> 	<p>Looking for ways to make 10.</p> <p>$36 + 25 =$ $30 + 20 = 50$ $5 + 5 = 10$ $50 + 10 + 1 = 61$</p> <p>1 5 36</p> <p>Formal method:</p> $\begin{array}{r} +25 \\ 36 \\ \hline 61 \\ 1 \end{array}$

Use of place value counters to add HTO + TO, HTO + HTO etc. When there are 10 ones in the 1s column- we exchange for 1 ten, when there are 10 tens in the 10s column- we exchange for 1 hundred.

100s	10s	1s
6	1	1

Children to represent the counters in a place value chart, circling when they make an exchange.

100s	10s	1s
00	0000	0000
000	0000	0000
6	1	1

$$\begin{array}{r} 243 \\ +368 \\ \hline 611 \\ \hline 11 \end{array}$$

Conceptual variation; different ways to ask children to solve 21 + 34

 <table border="1" style="margin: 10px auto; border-collapse: collapse;"> <tr> <td style="width: 50px; height: 20px; text-align: center;">?</td> </tr> <tr> <td style="width: 50px; height: 20px; text-align: center;">21</td> <td style="width: 50px; height: 20px; text-align: center;">34</td> </tr> </table>	?	21	34	<p>Word problems: In year 3, there are 21 children and in year 4, there are 34 children. How many children in total?</p> <p>$21 + 34 = 55$. Prove it</p>	$\begin{array}{r} 21 \\ +34 \\ \hline \end{array}$ <p>$21 + 34 =$</p> <div style="border: 1px dashed black; width: 30px; height: 30px; display: inline-block; margin-right: 5px;"></div> $= 21 + 34$ <p>Calculate the sum of twenty-one and thirty-four.</p>	<p>Missing digit problems:</p> <table border="1" style="margin: 10px auto; border-collapse: collapse;"> <thead> <tr> <th>10s</th> <th>1s</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">10 10</td> <td style="text-align: center;">1</td> </tr> <tr> <td style="text-align: center;">10 10 10</td> <td style="text-align: center;">?</td> </tr> <tr> <td style="text-align: center;">?</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>	10s	1s	10 10	1	10 10 10	?	?	5
?														
21	34													
10s	1s													
10 10	1													
10 10 10	?													
?	5													

Please read **Appendix A** (Addition & Subtraction White Rose Hub Calculation Policy) for a more in depth overview of these different models and images. Addition is also broken down into skills and each skill has a dedicated page to effectively teach that concept.

Calculation policy: Subtraction

Key language: take away, less than, the difference, subtract, minus, fewer, decrease.

Concrete	Pictorial	Abstract
<p>Physically taking away and removing objects from a whole (ten frames, Numicon, cubes and other items such as beanbags could be used).</p> <p>$4 - 3 = 1$</p>	<p>Children to draw the concrete resources they are using and cross out the correct amount. The bar model can also be used.</p>	<p>$4 - 3 =$</p>
<p>Counting back (using number lines or number tracks) children start with 6 and count back 2.</p> <p>$6 - 2 = 4$</p>	<p>Children to represent what they see pictorially e.g.</p>	<p>Children to represent the calculation on a number line or number track and show their jumps. Encourage children to use an empty number line</p>

<p>Finding the difference (using cubes, Numicon or Cuisenaire rods, other objects can also be used).</p> <p>Calculate the difference between 8 and 5.</p>	<p>Children to draw the cubes/other concrete objects which they have used or use the bar model to illustrate what they need to calculate.</p>	<p>Find the difference between 8 and 5.</p> <p>$8 - 5$, the difference is <input type="text"/></p> <p>Children to explore why $9 - 6 = 8 - 5 = 7 - 4$ have the same difference.</p>
<p>Making 10 using ten frames.</p> <p>$14 - 5$</p>	<p>Children to present the ten frame pictorially and discuss what they did to make 10.</p>	<p>Children to show how they can make 10 by partitioning the subtrahend.</p> <p>$14 - 5 = 9$</p> <p>$14 - 4 = 10$ $10 - 1 = 9$</p>
<p>Column method using base 10.</p> <p>$48 - 7$</p>	<p>Children to represent the base 10 pictorially.</p>	<p>Column method or children could count back 7.</p>

<p>Column method using base 10 and having to exchange. 41 - 26</p>	<p>Represent the base 10 pictorially, remembering to show the exchange.</p>	<p>Formal column method. Children must understand that when they have exchanged the 10 they still have 41 because $41 = 30 + 11$.</p>	
<p>Column method using place value counters. 234 - 88</p>	<p>Represent the place value counters pictorially, remembering to show what has been exchanged.</p>	<p>Formal column method. Children must understand what has happened when they have crossed out digits.</p>	
<p style="text-align: center;">Conceptual variation; different ways to ask children to solve 391 - 186</p>			
	<p>Raj spent £391, Timmy spent £186. How much more did Raj spend?</p> <p>Calculate the difference between 391 and 186.</p>	<p>$\square = 391 - 186$</p> <p>391 <u>-186</u> —</p> <p>What is 186 less than 391?</p>	<p>Missing digit calculations</p>

Please read **Appendix A** (Addition & Subtraction White Rose Hub Calculation Policy) for a more in depth overview of these different models and images. Subtraction is also broken down into skills and each skill has a dedicated page to effectively teach that concept.

Calculation policy: Multiplication

Key language: double, times, multiplied by, the product of, groups of, lots of, equal groups.

Concrete	Pictorial	Abstract
<p>Repeated grouping/repeated addition 3×4 $4 + 4 + 4$ There are 3 equal groups, with 4 in each group.</p>	<p>Children to represent the practical resources in a picture and use a bar model.</p>	<p>$3 \times 4 = 12$ $4 + 4 + 4 = 12$</p>
<p>Number lines to show repeated groups- 3×4</p> <p>Cuisenaire rods can be used too.</p>	<p>Represent this pictorially alongside a number line e.g.:</p>	<p>Abstract number line showing three jumps of four.</p> <p>$3 \times 4 = 12$</p>
<p>Use arrays to illustrate commutativity counters and other objects can also be used. $2 \times 5 = 5 \times 2$</p> <p>2 lots of 5 5 lots of 2</p>	<p>Children to represent the arrays pictorially.</p>	<p>Children to be able to use an array to write a range of calculations e.g.</p> <p>$10 = 2 \times 5$ $5 \times 2 = 10$ $2 + 2 + 2 + 2 + 2 = 10$ $10 = 5 + 5$</p>
<p>Partition to multiply using Numicon, base 10 or Cuisenaire rods. 4×15</p>	<p>Children to represent the concrete manipulatives pictorially.</p>	<p>Children to be encouraged to show the steps they have taken.</p> <p>4×15 $10 \ 5$</p> <p>$10 \times 4 = 40$ $5 \times 4 = 20$ $40 + 20 = 60$</p> <p>A number line can also be used</p>
<p>Formal column method with place value counters (base 10 can also be used.) 3×23</p>	<p>Children to represent the counters pictorially.</p>	<p>Children to record what it is they are doing to show understanding.</p> <p>3×23 $3 \times 20 = 60$ $20 \ 3$ $3 \times 3 = 9$ $60 + 9 = 69$</p> <p>23 $\times 3$ $\hline 69$</p>

<p>Formal column method with place value counters.</p> <p>6×23</p>	<p>Children to represent the counters/base 10, pictorially e.g. the image below.</p>	<p>Formal written method</p> $6 \times 23 =$ $\begin{array}{r} 23 \\ \times 6 \\ \hline 138 \\ 11 \end{array}$	
<p>When children start to multiply $3d \times 3d$ and $4d \times 2d$ etc., they should be confident with the abstract:</p> <p>To get 744 children have solved 6×124. To get 2480 they have solved 20×124.</p>		<p>Answer: 3224</p>	
<p>Conceptual variation; different ways to ask children to solve 6×23</p>			
	<p>Mai had to swim 23 lengths, 6 times a week. How many lengths did she swim in one week?</p> <p>With the counters, prove that $6 \times 23 = 138$</p>	<p>Find the product of 6 and 23</p> $6 \times 23 =$ $\begin{array}{r} 6 \quad 23 \\ \times 23 \quad \times 6 \\ \hline \end{array}$	<p>What is the calculation? What is the product?</p>

Please read **Appendix B** (Multiplication & Division White Rose Hub Calculation Policy) for a more in depth overview of these different models and images. Multiplication is also broken down into skills and each skill has a dedicated page to effectively teach that concept.

Calculation policy: Division

Key language: share, group, divide, divided by, half.

Concrete	Pictorial	Abstract		
<p>Sharing using a range of objects. $6 \div 2$</p>	<p>Represent the sharing pictorially.</p>	<p>$6 \div 2 = 3$</p> <table border="1" style="width: 100%;"> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">3</td> </tr> </table> <p>Children should also be encouraged to use their 2 times tables facts.</p>	3	3
3	3			
<p>Repeated subtraction using Cuisenaire rods above a ruler. $6 \div 2$</p> <p style="text-align: center;">3 groups of 2</p>	<p>Children to represent repeated subtraction pictorially.</p>	<p>Abstract number line to represent the equal groups that have been subtracted.</p>		
<p>$2d + 1d$ with remainders using lollipop sticks. Cuisenaire rods, above a ruler can also be used. $13 \div 4$</p> <p>Use of lollipop sticks to form wholes- squares are made because we are dividing by 4.</p> <p>There are 3 whole squares, with 1 left over.</p>	<p>Children to represent the lollipop sticks pictorially.</p> <p>There are 3 whole squares, with 1 left over.</p>	<p>$13 \div 4 = 3$ remainder 1</p> <p>Children should be encouraged to use their times table facts; they could also represent repeated addition on a number line.</p> <p>'3 groups of 4, with 1 left over'</p>		
<p>Sharing using place value counters. $42 \div 3 = 14$</p>	<p>Children to represent the place value counters pictorially.</p>	<p>Children to be able to make sense of the place value counters and write calculations to show the process.</p> <p>$42 \div 3$ $42 = 30 + 12$ $30 \div 3 = 10$ $12 \div 3 = 4$ $10 + 4 = 14$</p>		

Short division using place value counters to group.
 $615 \div 5$

100s	10s	1s
1	2	3

1. Make 615 with place value counters.
 2. How many groups of 5 hundreds can you make with 6 hundred counters?
 3. Exchange 1 hundred for 10 tens.
 4. How many groups of 5 tens can you make with 11 ten counters?
 5. Exchange 1 ten for 10 ones.
 6. How many groups of 5 ones can you make with 15 ones?

Represent the place value counters pictorially.

Children to the calculation using the short division scaffold.

$$\begin{array}{r}
 123 \\
 5 \overline{) 615} \\
 \underline{5} \\
 11 \\
 \underline{10} \\
 15 \\
 \underline{15} \\
 0
 \end{array}$$

Long division using place value counters
 $2544 \div 12$

1000s	100s	10s	1s

We can't group 2 thousands into groups of 12 so will exchange them.

1000s	100s	10s	1s

We can group 24 hundreds into groups of 12 which leaves with 1 hundred.

$$\begin{array}{r}
 02 \\
 12 \overline{) 2544} \\
 \underline{24} \\
 1 \\
 \underline{12} \\
 2
 \end{array}$$

1000s	100s	10s	1s

After exchanging the hundred, we have 14 tens. We can group 12 tens into a group of 12, which leaves 2 tens.

$$\begin{array}{r}
 021 \\
 12 \overline{) 2544} \\
 \underline{24} \\
 14 \\
 \underline{12} \\
 2
 \end{array}$$

1000s	100s	10s	1s

After exchanging the 2 tens, we have 24 ones. We can group 24 ones into 2 group of 12, which leaves no remainder.

$$\begin{array}{r}
 0212 \\
 12 \overline{) 2544} \\
 \underline{24} \\
 14 \\
 \underline{12} \\
 24 \\
 \underline{24} \\
 0
 \end{array}$$

Conceptual variation; different ways to ask children to solve $615 \div 5$

<p>Using the part whole model below, how can you divide 615 by 5 without using short division?</p>	<p>I have £615 and share it equally between 5 bank accounts. How much will be in each account?</p> <p>615 pupils need to be put into 5 groups. How many will be in each group?</p>	$5 \overline{) 615}$ <p>$615 \div 5 =$</p> <p>$\square = 615 \div 5$</p>	<p>What is the calculation? What is the answer?</p> <table border="1" style="width: 100%; text-align: center;"> <thead> <tr> <th style="width: 33%;">100s</th> <th style="width: 33%;">10s</th> <th style="width: 33%;">1s</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>	100s	10s	1s			
100s	10s	1s							

Please read **Appendix B** (Multiplication & Division White Rose Hub Calculation Policy) for a more in depth overview of these different models and images. Division is also broken down into skills and each skill has a dedicated page to effectively teach that concept.

H Maddock, September 2022
